LABORATORY TEST REPORT

Issue date: 2026-08-24 | Reference: SYN/2026/0009
Lot / batch: SYN-LOT-26-009

Product / sample: Kraft Liner KL150, uncoated
Client: Evratyn Export Assemblies | Nordelvia Components, EU demo buyer
Received: 2026-08-18 | Tested: 2026-08-20 to 2026-08-22

Method: XRF screening followed by CR 13695-1:2000 confirmation. Reported values below are confirmatory results; XRF alone is not the basis for the Cr(VI) result.

Analyte	Result	Detection limit	Unit
Pb	0.8	0.1	mg/kg
Cd	ND	0.2	mg/kg
Hg	ND	0.1	mg/kg
Cr(VI)	ND	0.1	mg/kg
Pb+Cd+Hg+Cr(VI)	<1.5		mg/kg

ND = not detected at the listed detection limit. ND is not zero. The computed aggregate is reported as an upper bound using quantified values and detection limits.

Acceptance criterion: Pb + Cd + Hg + Cr(VI) <=100 mg/kg under Regulation (EU) 2025/40 Article 5(4). Assessment relates only to the submitted sample.

Report validity: no fixed expiry; applies only to the tested sample and lot.
