LABORATORY TEST REPORT

Issue date: 2026-08-24 Reference: SYN/2026/0008
Lot / batch: SYN-LOT-26-008

Product / sample: HDPE Bottle HB500, unpigmented
Client: Evratyn Export Assemblies | Nordelvia Components, EU demo buyer
Received: 2026-08-18 | Tested: 2026-08-20 to 2026-08-22

Method: XRF screening followed by CR 13695-1:2000 confirmation. Reported values below are confirmatory results; XRF alone is not the basis for the Cr(VI) result.

Analyte	Result	Detection limit	Unit
Pb	2.4	0.1	mg/kg
Cd	<LOD	0.2	mg/kg
Hg	<LOD	0.1	mg/kg
Cr(VI)	0.5	0.1	mg/kg
Pb+Cd+Hg+Cr(VI)	<3.2		mg/kg

<LOD = below limit of detection. Below-detection results are not zero. Sum of quantified results = 2.9 mg/kg; bounded aggregate is [2.9, 3.2) mg/kg using the listed LODs.

Acceptance criterion: Pb + Cd + Hg + Cr(VI) <=100 mg/kg under Regulation (EU) 2025/40 Article 5(4). Assessment relates only to the submitted sample.

Report validity: no fixed expiry; applies only to the tested sample and lot.
